SIP and Security

This security module is part of the main ‘SIP School’ training package but is offered as a separate module for purchase for people who are only interested in this element.

Please note that a good knowledge of SIP is required to work through this module and there is no certification associated with this module in its ‘stand alone’ format.

SIP Security

SIP Security is a complex issue and this module covers many SIP Security problems along with possible solutions.

Topics include:

- Authentication
- Authorization
- Encryption
- Firewalls, NAT and SIP
- Firewall and NAT Solutions
- Attacks and Responses
